SWIPE, TAP OR CHIP CREDIT CARDS AT YOUR COMPUTER WITH MANGO CCS

CREDIT CARD SWIPER FEATURES:

- ✓ Easy-to-use and setup
- ✓ Reads credit cards three ways, chip, swipe or tap.
- ✓ Convenient and compact size - 6.5 x 1.5 x 1.5".
- ✓ Process transactions in your Route Manager software with our Point of Sale module.
- ✓ Connects via USB for ease-of-use

COLLECT PAYMENTS FASTER

Give your office staff the ability to swipe, tap and read credit card information at anytime from their computer. Get real-time approval on your credit card transactions with an internet connection and credit card processor, like BASYS, authorize.net or other RMA compatible suppliers.

COMPACT AND CONVENIENT UNIT

Place the unit on your desk or the side of your computer. We even include a strip of Velcro so you can keep it in place. The credit card reader is powered by the USB port so no external power supply is needed.

AFFORDABLY PRICED

At only \$89 per unit, we make it economical so all office staff can have a Mango CCS at their computer. This is a one-time charge with no additional monthly fee.

ABOUT MANGO CCS

Beginning with Version 8 of Route Manager, we have included new drivers to allow your office staff to use the Mango CCS (credit card swiper) to help them collect payments in the office. If you take credit cards in the office, this is the perfect tool to enable you to swipe, tap or chip read all types of credit cards.

GETTING MANGO CCS TO WORK

This is done with a couple of easy steps.

- Adjust the settings on your desktop software so the Mango CCS only accepts the type of cards you take.
- Plug in the USB-A connector to the back of your computer.
- Confirm that you are on RMA Version 8.

Now you will be swiping in no time!

For detailed installation instructions please visit our web site at www.AdvantageRoute.com/ccs

USING MANGO CCS

Using the credit card reader is easy! There are multiple ways to process credit cards:

1. The *Customer* screen
2. Shopping cart while taking orders
3. Point of Sale system
4. Within *Invoice Entry*

*If using the chip of NFC, you will need to manually enter the name of the card holder. This information is hidden for security purposes.

Inexpensive, easy-to-use and durable. What else do you need?
