POINT OF SALE

THE FASTER WAY TO PROCESS IN-STORE CUSTOMER ORDERS

- ✔ Set up a digital cash register directly on a desktop computer
- ✔ Set up a touchscreen for an even faster checkout
- ✔ Use barcode scanners to easily manage your inventory
- ✔ Accept cash and credit cards in your store
- ✔ Pin your top 10 best-selling products for easy access and faster checkout
- ✔ Create a separate in-store price list for added discounts

Mango Point of Sale (Mango POS) integrates directly with your Route Manager software and enables you to turn any desktop computer or Windows touchscreen tablet into a digital cash register to help customers check out faster.

- Create a digital cash register from your existing desktop computer or tablet device.
- Help customers to check out faster by easily integrating touchscreen monitors, bar code readers, and credit card scanners in your store.
- Streamline operations by working directly through the Route Manager program so your product inventory and customer details stay up-to-date in RMA.

A MORE EFFICIENT WAY TO SERVICE CUSTOMERS

Process Cash or Credit Sales – Allow customers to pay by cash, credit card, check – or even charge the sale. If you accept credit cards, it is easy to swipe your customer's card to ring up the sale.

Touchscreen Convenience – The software can be viewed and used on a touchscreen monitor or tablet device, meaning you can quickly tap the screen to process orders faster.

Process Transactions Quickly and Easily – Whether selling to existing customers or walk-in customers, Mango POS allows you to process payments faster while also managing your inventory levels.

Better Customer Service – Easily process payments in-store to help customers checkout faster and reduce wait times or lineups in your store.

AFFORDABLE PRICING

\$ 20/month

Charge is per user. No annual fees.

A MORE EFFICIENT WAY TO SERVICE CUSTOMERS

Integrate Directly with RMA – Keep product inventory and customer details up to date directly through Route Manager.

Works on a Regular Desktop – Use the Mango Point of Sale system (or our POS system) in your store, regardless if your configuration involves a single workstation, mapped drives, or RDP. You design the screen to show the products you use the most.

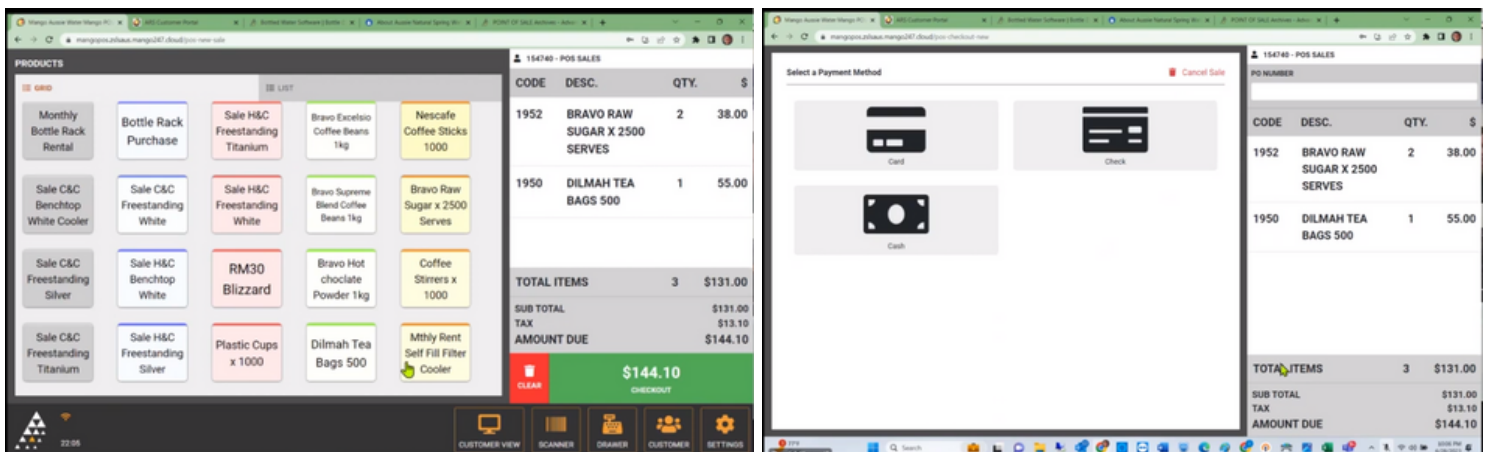

Touchscreen Functionality – Your team can easily maneuver through the customer checkout with the touch of a finger.

Credit Card Swipe Option – Easily process credit cards directly in your store using a credit card reader.

Pin Your Top 10 Products – Pin products to your Top 10 list for quick access so team members can speed up the sale.

Works with Barcode Scanners – No more entering products or remembering product IDs – easily scan codes with a wired or wireless barcode scanner.

Separate In-Store Price List – If you have lower pricing for customers who buy in-store instead of having deliveries made on route, you can build that separate pricing list into the point-of-sale system – without an override.

SYSTEM REQUIREMENTS

- RMA Version 8.1 or later
 - An Internet connection
 - Windows 11 or later
 - Manually set up your POS Configuration and Quick Sale Products
 - Install appropriate hardware – credit card reader and barcode scanner
- *Optionally purchase our complete all-in-one POS hardware unit shown here.
