

Route 8.0 Manager™ *docking*

SYNC DATA IN YOUR EXISTING ACCOUNTING SOFTWARE – DIRECTLY WITH YOUR HANDHELD DEVICES

HOW IT WORKS

Integrate Route Manager with your existing accounting software to enable your team to create invoices and make payments from either their handhelds, or their desktop. When docked with Route Manager, all of your data is kept in your current accounting software, but details such as customer names, items, prices, invoices and payments are made available on your handheld devices. When data is posted during daily processes, invoices and payments are then transferred back to your accounting software.

INTEGRATES WITH MANY SOFTWARE PROGRAMS

- ✔ **Quickbooks** - 2006 or newer
- ✔ **Peachtree/Sage** - Sage 50 - all versions
- ✔ **MYOB** - Desktop versions since 2013
- ✔ **Several More!** Inquire for details.

BENEFITS

SAVE TIME - Connect handhelds to your accounting software and start collecting data within hours.

SYNC IMPORTANT DATA - We continuously sync data from your computer so that you have up-to-date names, prices and products. Then, we pass invoice data back to your software - along with the payments your drivers collect.

CREATE & PRINT INVOICES - Provide customers with neatly printed invoices from portable printers and easily save information from the handheld to your accounting software. You can even email receipts to your customers.

MAINTAIN ACCURATE DATA - All of your data is kept up-to-date in your current accounting software, while making some of this information available on your handhelds.

CONVENIENT ACCESS - Get accounts receivable information directly from your accounting software, enabling your route delivery personnel to view open balances and collect on overdue invoices.

SOFTWARE SYSTEMS COMPATIBLE WITH MANGO DOCKING

Software	Version	Level		
		Pro	Premier	Enterprise
QuickBooks	2016/17	✓	✓	✓
QuickBooks	2011-13, AU - Reckon	✓	✓
